

Ana Carolina Magalhães

Product Designer | Frontend Development

Product Designer with a background in Architecture and currently studying Fullstack Development. I combine design and code to create websites and apps that are easy to use and technically sound.

My experience includes designing interfaces in Figma and building web applications with React.js and TypeScript. I use my architectural training to solve complex problems and manage projects effectively. I am focused on creating digital products that look great and work perfectly for the user.

Work experience

Product Designer & Frontend Developer

Remote Crew, Remote

October 2025

February 2026

- Designed interfaces for the website and platform using Figma, focusing on usability and visual consistency.
- Developed and improved frontend functionality, refactoring pages and fixing bugs with Vue.js and Nuxt.
- Delivered polished, responsive interfaces bridging design and code.

UX/UI Designer

Flix E-commerce, Remote

January 2025

June 2025

- Conducted Conversion Rate Optimization (CRO) analysis to identify opportunities for improving website performance and user satisfaction.
- Utilized Microsoft Clarity to analyze user behavior on the website, identifying friction points and generating insights to guide UX improvements.
- Provided continuous suggestions for enhancing user experience and interface design, with the aim of boosting usability and conversion rates.
- Performed manual testing of new features to ensure proper functionality and responsiveness across different devices and browsers.

Frontend Web Developer

Conta Café

December 2023

December 2024

- Responsiveness: Ensured all interfaces were fully responsive, providing a consistent and optimized user experience across mobile, tablet, and desktop devices.
- Component Redesign: Redesigned and styled several user interface components, improving the usability and visual appearance of the application.
- Notification Component Creation: Developed a custom notification component, integrated with the system, to alert users of important updates in real time.
